Professional Experience

Software Engineer 3, 1Digitalstack.ai – Remote

March 2022 – Present

Projects:

- **RAG-Based Chatbot for E-commerce Analytics:** Spearheading the design and development of a chatbot leveraging Retrieval-Augmented Generation (RAG) for actionable insights and analytics in e-commerce. Responsible for building the frontend, backend, and integration with RAG-based APIs, enabling the chatbot to perform analytics and automate actions.
- **Enterprise Newsletter System:** Developed an self serve email platform for companies selling on ecommerce platforms to create, schedule, and send newsletters for dashboard updates and performance reports using a custom drag-and-drop editor. Built an analytics dashboard that increased user engagement by 40%.
- **Legacy System Modernization:** Migrated a critical business application stack from PugJS to ReactJS, implementing a microservices architecture with modern state management. This achieved a 40% performance improvement and accelerated development cycles by 50%.
- **Analytics & Visualization Platform:** Architected enterprise-grade data visualization solutions, integrating multiple BI tools and implementing Apache Superset to enable self-service analytics for 50+ enterprise clients. Reduced custom report requests by 30% and improved client satisfaction by 35%.
- **RESTful API Design and Optimization:** Developed scalable APIs with advanced caching mechanisms and a Sphinx-based search system processing over 1M records, achieving 70% faster search times.

Tech Stack: React, TypeScript, PugJS, Webpack, Vite, Node.js, SASS, Bootstrap, PostgreSQL, Redis, Docker

Associate Consultant Level-1, Fact.MR – Pune, India

December 2020 – July 2021

- Developed and implemented automated data collection systems using Python, resulting in 70% faster market analysis processes. Created dynamic PowerBI dashboards that provided real-time market insights, leading to a 40% increase in client engagement and a 25% improvement in report delivery times.

Tech Stack: Python, SQL, Excel, PowerBI, MS Office

Skills

Programming Languages

HTML5, CSS3, JavaScript (ES6), TypeScript, Python, Bash

JavaScript Frameworks

React.js, Next.js, Redux, Node.js, Express.js

Databases

PostgreSQL, MongoDB, Redis, Trino

Web Technologies

SASS, Bootstrap, Vite, PugJS, MJML, RESTful APIs

DevOps & Infrastructure

Docker, RabbitMQ, Keycloak, Nginx, Apache

Version Control & CI/CD

Git, GitLab, GitHub Actions

Education

Bachelors of Technology in Mechanical Engineering

July 2017 – July 2021

Lovely Professional University, Phagwara, Punjab
